

WBPP: ITD

Innovative Technology Demonstrations

- May 14, 2019
- Presented by Brian Mintz, GM Phoscrete Concretes
- Working Group Members:
 - *Brian Mintz (Chair), Lorella Angellini (Consultant), Richard Dunne (Academia), Kevin Irving (Industry), William Olivia (Owner-WisDOT), Walter Peters (Owner-ODOT), Ed Welch (TSP2)*

Work Scope

- **ITD: Innovative Technology Demonstrations**
- ITD is a AASHTO/TSP2 National Working Group formed to introduce and demonstrate new and innovative technologies, products, and services to the DOT and other Owners.

Problem Statement

- Incomplete Documentation
- Bias of Case Studies and References
- One Strike and You're Out
- Lack of Inter-Agency Communications

A Faster Path to the Best Solutions

- Because of all the complexities and risks involved in bringing new products and services into acceptance and use by the states, ITD offers a faster path to demonstrate, observe, document, and share both successes and failures of innovative technologies.
- ITD helps industry speed the best solutions to market, and saves the agencies the cost of wasted time and resources on unsuccessful technologies.

Key Points

- Joint Effort - Owner (DOT) & Product Supplier
- Field Demonstrations
- Rigorous Independent Oversight for up to 60 months
- Results vetted thru TSP2 ITD Working Group

ITD Partners

Manufacturer

Consultant

Owner/DOT

TSP2 Bridge

Manufacturer

- On-Site Installation Support
- Compensates Consultant
- Responsible for Follow Up

Independent Consultant

- Key to the ITD program is engaging an independent consultant to document all installations, **good, bad, and ugly**.

Owner Commitment

- Identifies location
- Purchases product
- Provides traffic control, equipment, and labor
- Performs scheduled inspections

TSP2 Bridge

- Approves Participants
- Program Oversight
- Publishes Data
- Presentations

Demonstrations and Reporting

- Demonstrations can be product, process, service and/or equipment for bridge preservation.
- ITD Reports to be a resource for DOT's and other bridge preservation practitioners.
- Replaces inefficient, non-rigorous evaluation of pilot installation (deployment) of innovative products at every DOT.
