Welcome

The American Association of State Highway Transportation Officials (AASHTO) is dedicated to the preservation and maintenance of highway assets. In May 2006, the National Center for Pavement Preservation (NCCPP) was contracted to develop and administer its new *Transportation System Preservation Technical Services Program (TSP-2)*. The program was initiated as an efficient means to disseminate information to AASHTO member agencies for preserving their highway infrastructure, including both pavements and bridges. Its principal mission will be to serve as a clearinghouse with comprehensive and up-to-date information on efficient and effective preservation measures that enhance highway performance and extend useful life.

New TSP² Site!

The new TSP² site has launched! The site has many new features to offer and will be populated with new information as it becomes available.
