

# CEM STRIPE

*driving pavement solutions*

## **Cem/Stripe™ is a Revolutionary Cement Based High Endurance Pavement Marking System**

- **Superb Life Cycle Performance**  
Cem/Stripe provides years of Maintenance Free Service
- **Rapid Drying in all Temperatures**  
Accepts wheeled traffic immediately Without Tracking
- **Exceptional Interconnecting Bonds to Concrete and Asphalt Surfaces**  
The Cem/Stripe Bond prevents Delamination and Adheres (Restriping) To other Marking Materials
- **Highly Abrasion Resistant**  
The components in Cem/Stripe are tough and produce highly Wear Resistant Surfaces
- **Environmentally Friendly**  
Cem/Stripe is 100% VOC free and is resistant to UVR Degradation and Fading
- **Can be Applied with Conventional Paint Striping Equipment**  
Minor modifications may be Necessary

The unique and proprietary chemical properties in Cem/Stripe produce a **peerless** interconnected molecular diffusive bond and unlike other materials that weaken in time, Cem/Stripe grows stronger as it ages. Finally a durable pavement marking system that provides years of maintenance free service that can be easily applied with conventional paint striping equipment. In addition to high durability the Cem/Stripe System produces enhanced pavement contrasting properties when wet.
