Welcome

Transportation System Preservation Technical Services Program (TSP-2) was initiated as an efficient means to disseminate information to AASHTO member agencies for preserving their highway infrastructure, including both pavements and bridges. Its principal mission is to serve as a clearinghouse with comprehensive and up-to-date information on efficient and effective preservation measures that enhance highway performance and extend useful life.

What is Bridge Preservation

Bridge Preservation is "actions or strategies that prevent, delay or reduce deterioration of bridges or bridge elements, restore the function of existing bridges, keep bridges in good condition and extend their life." *Source: AASHTO Board of Directors, Policy Resolution PR-3-11, October 17, 2011.*

Action Item – Research

NCHRP 14–23: Practical Bridge Preservation Actions and Investment Strategies

Completion Date: 3–10–15

Objective: To develop a handbook for possible adoption by AASHTO that will assist state departments of transportation in making bridge preservation investment decisions.

STATUS: The project panel approved the Interim Report No. 1 and the work plan for the remainder of the project. Work is in progress on Phase II of four phases.

Action Item – Research

NCHRP 14–30: Spot Painting to Extend Highway Bridge Coating Life

Objective: to develop guidelines for the selection and use of a broad spectrum of protective materials for spot treatment of failed coatings on steel highway bridges.

STATUS: Proposals have been received in response to the RFP. The panel met in December 2012 and selected a contractor to perform the work.
