

# Chip Seal Specifications and Guidelines

- Scope: To develop standardized emulsion specifications and collect best practice guidelines.
- **Phase 1: Emulsion Specifications**
- Regional agencies polled for chip emulsion specifications.
- Specifications for chip seal emulsions completed in 2011. These specifications include: CRS-2, CRS-2H, and CRS-2P with latex and solid polymer.
- **Phase 2: Best Practices**
- Best practices information collected.
- The task group is working on how to make this information available.
