

Showing the \$ Benefits

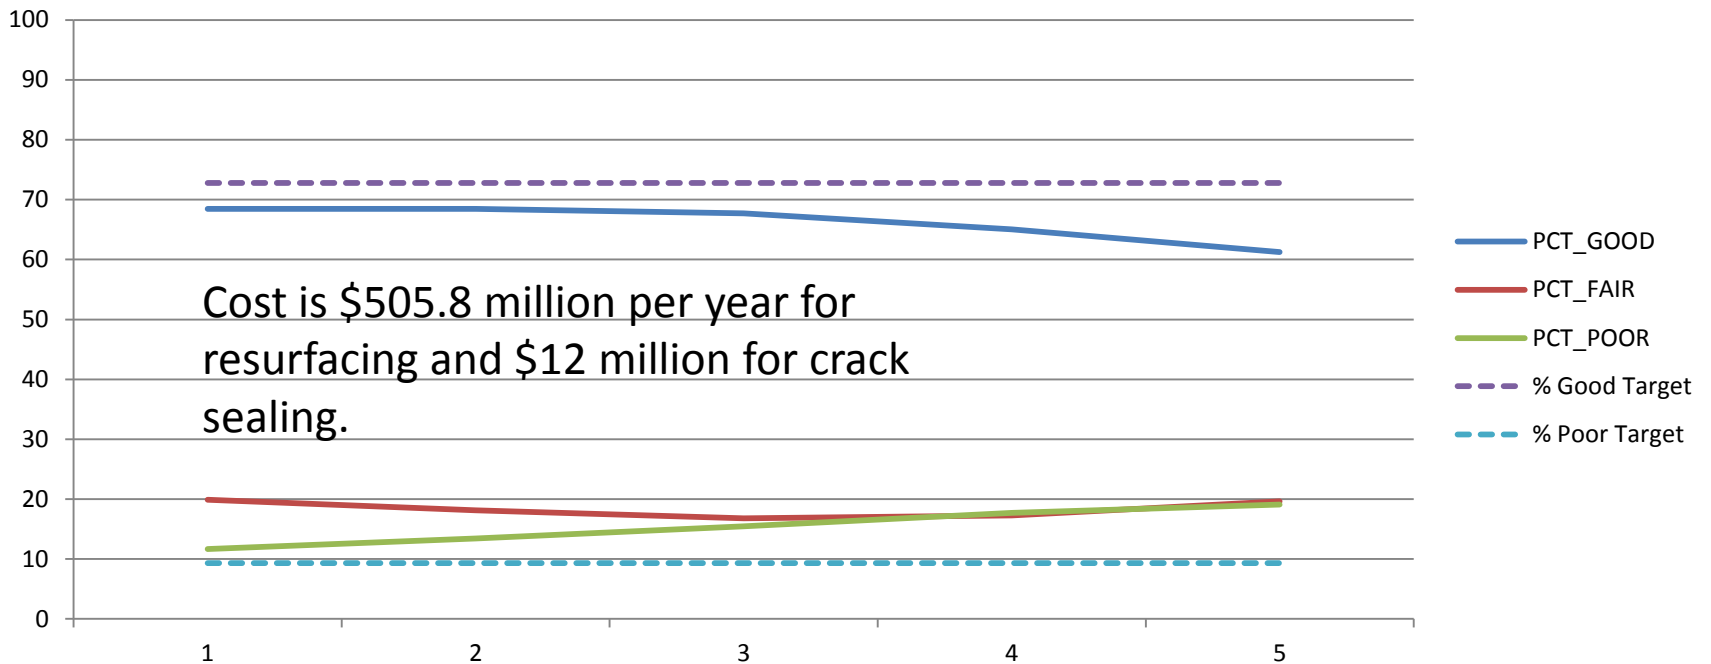

Judy Corley-Lay
May 28, 2014

Several questions needed answers

- What will happen to PCR's if we eliminate funding for chip seal program?
- If we reach our performance targets using HMA only, how much will it cost?
- At what level of funding can we hold our conditions?

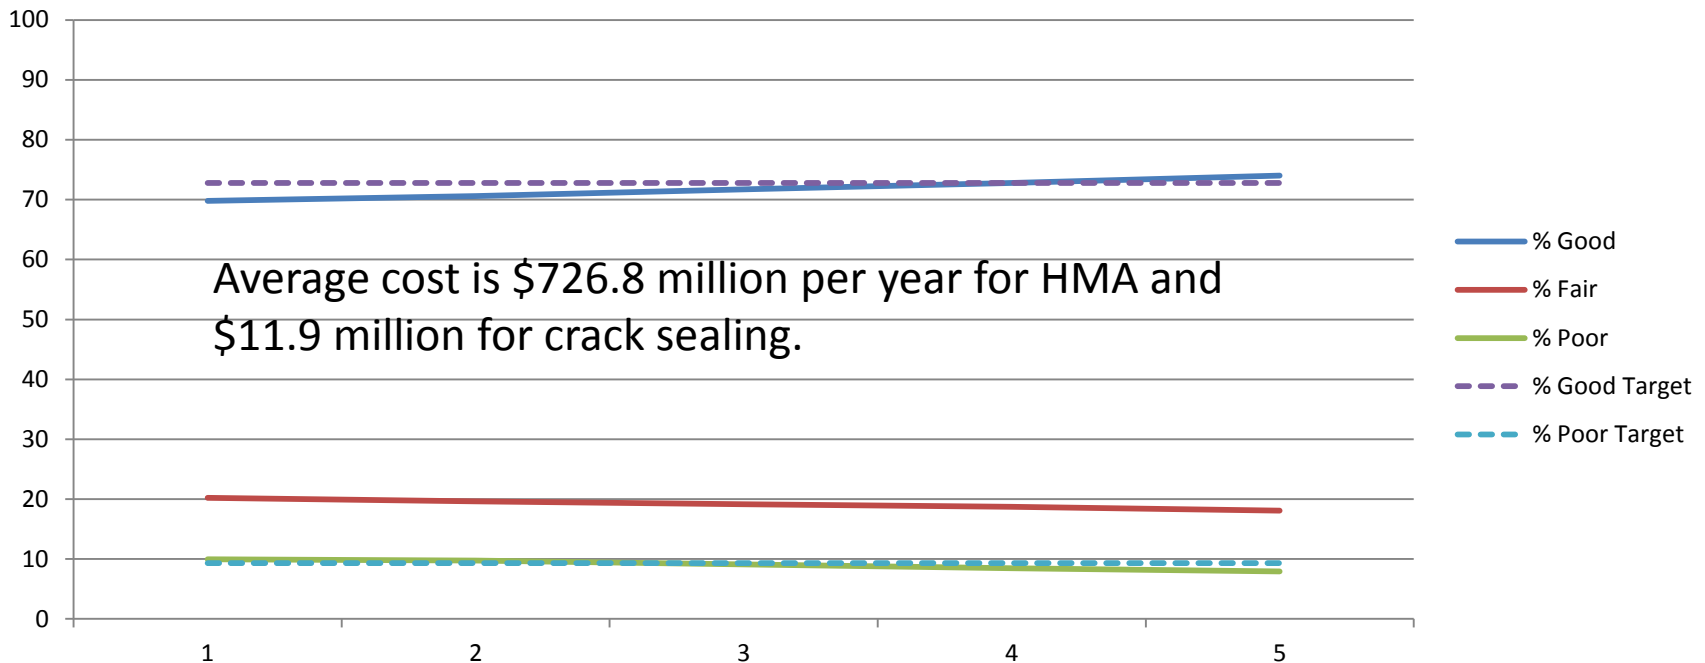

No Preservation & Current Resurfacing

Statewide

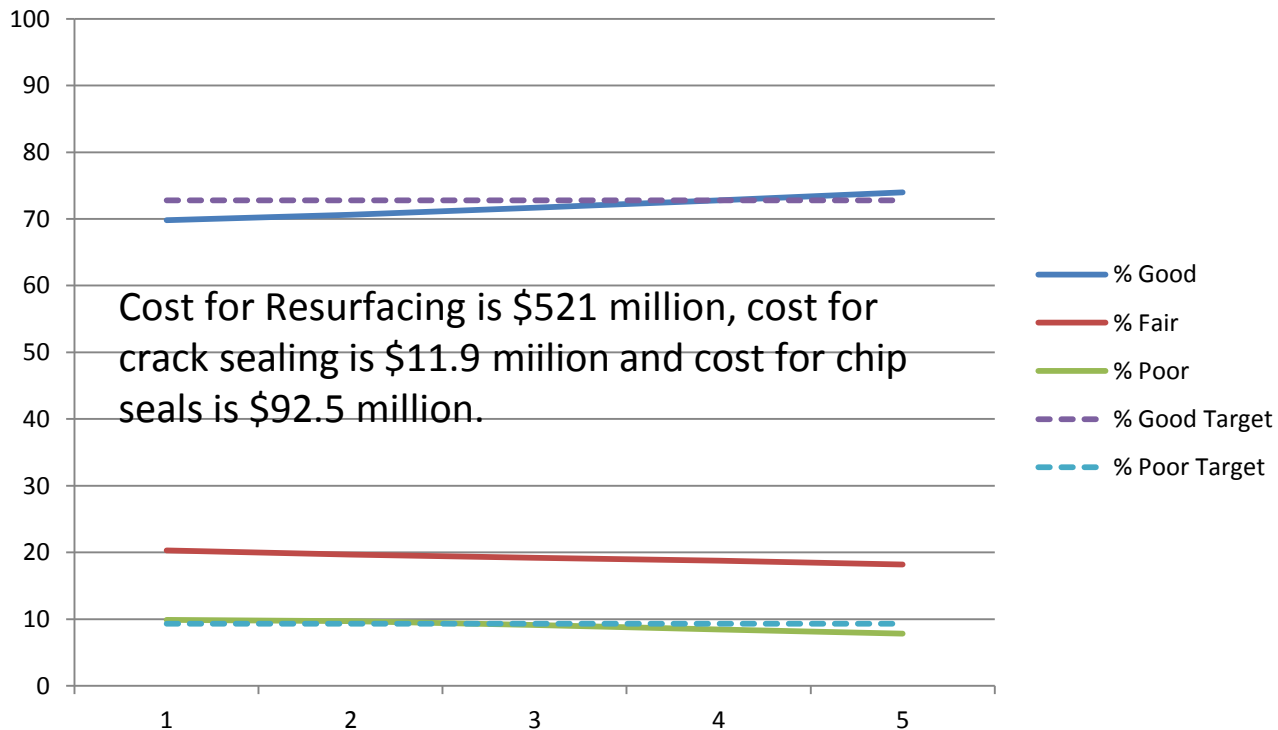

How much to Meet our Targets with no Preservation? Only HMA overlays.

Statewide

\$ to Meet our Targets but allow Chip Seals

Statewide

Conclusions

- We can save \$100 million per year by including chip seals!
- Analysis requires good cost data and improved performance curves.
- We struggle even with this information to convince decision makers...
