2017 Truck Engines

- Ready for 2017 with a complete lineup from 5-15 liters

2017 ISX15

- Nearly 9 million test miles by launch
- Optimized for customer segments:
 - Fuel Economy
 - High Performance
- Integrated ADEPT technology
- Commitment to best-in-class uptime

Redefining Fuel Economy. 400-500 hp.

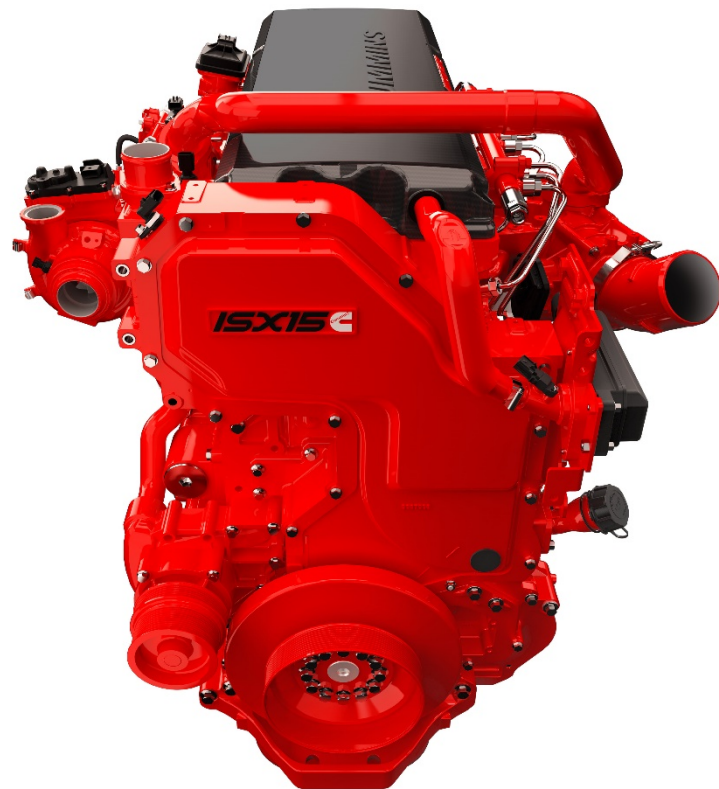

- Class-leading peak torque at lower RPMs
- Highly efficient turbocharger
- Integrated ADEPT electronic features

Redefining Performance. 485-605 hp.

- Enhanced efficiency with no compromise in productivity
- Faster transient response
- Increased braking power at lower RPM

2017 Single Module Aftertreatment

- Ultra-high efficiency
- Takes up less space
- Easier installation
- Simpler to maintain

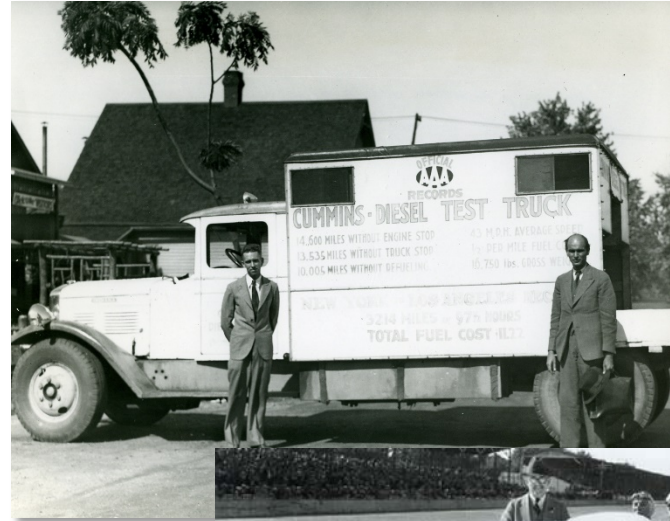

Redefining Efficiency.

1931 Coast-to-Coast Tour

- Clessie Cummins - 1931 cross country tour
 - Payload was #8 racecar
 - Total fuel cost = \$11.22
- #8 racecar set efficiency records of its own

The Redefining Tour

2015 Redefining Tour

- Customer engagement leveraging expertise of Cummins experts and channel
- Showcase and demonstrate product line up for North American truck customers
 - 5-15L diesel and natural gas engines and systems
 - Static displays and installed in the fleet trucks
 - Current and future products and technologies
 - Digital displays and incorporated into the fleet
