

NEPPP Annual Meeting

April 29 – May 1, 2015

Newark, Delaware

Corporate Headquarters
Braintree, MA

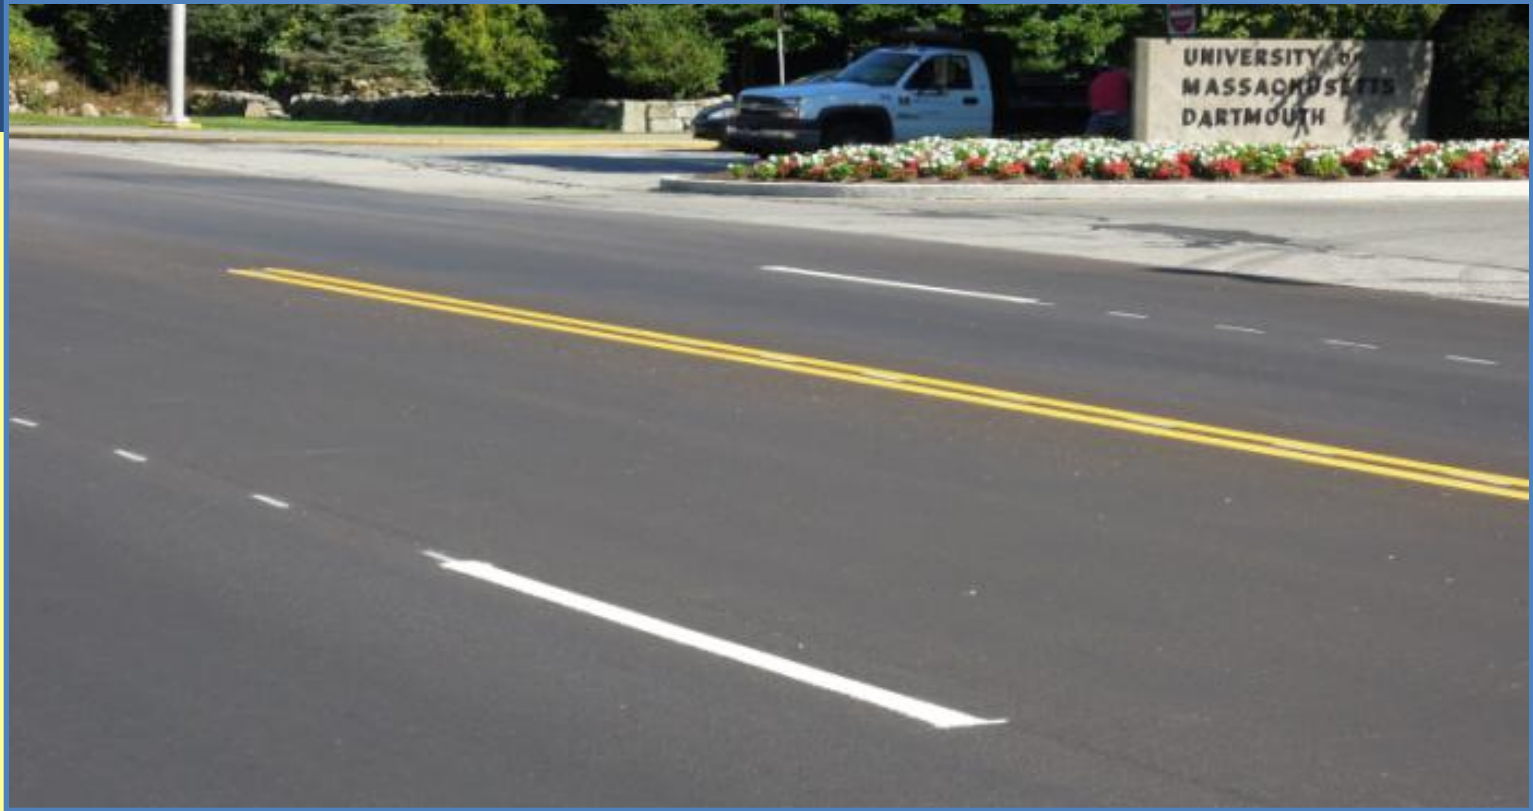

Bridge Preservation

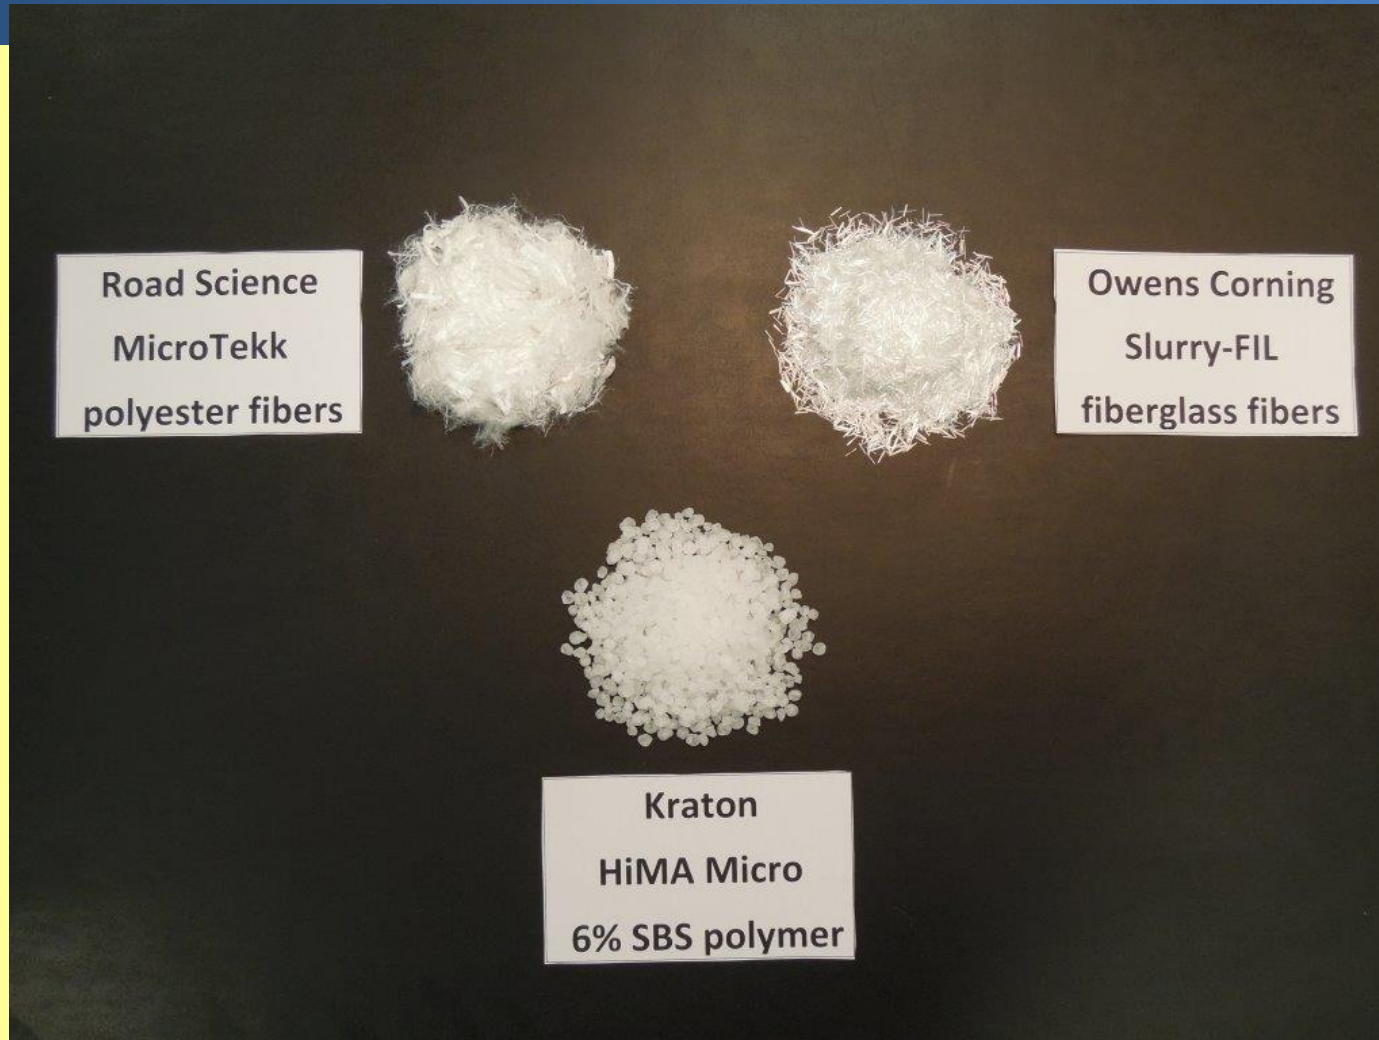

Pavement Preservation

Old Westport Road-Dartmouth, MA

**“Next Generation” Microsurfacing
Demonstration Project**

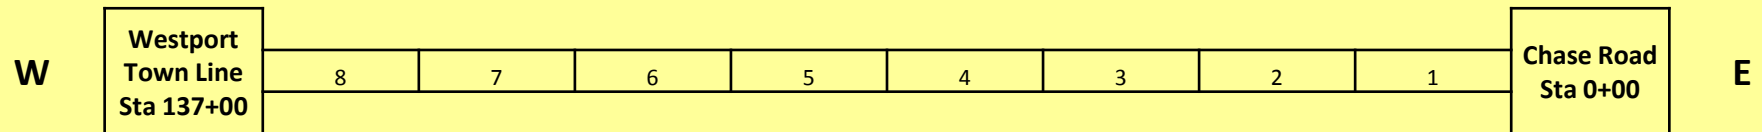

“Next Generation” Microsurfacing Options

Dartmouth MA -- Old Westport Road

"Next Generation Micro-surfacing" Demonstration Project

Test Section Schematic Diagram

Test

<u>Section(s)</u>	<u>Microsurfacing System & Description</u>	<u>From</u>	<u>To</u>	<u>Nearest Reference</u>	<u>Area (s.y.)</u>
1	MicroTekk polyester fiber-reinforced by Road Science	0+00	17+66	31' east of Althea Ave. intersection	6,140
2	Conventional micro-surfacing	17+66	31+37	24' west of Stonegate Way inters.	4,577
3	Fiber-Fil fiberglass fiber-reinforced by Owens-Corning	31+37	43+69	184' east of UMass entrance drive	5,892
4 & 5	Highly Modified Asphalt (HiMA) with Kraton SBS polymers	43+69	83+88	98' west of Blossom Rd. intersection	17,080
6	Fiber-Fil fiberglass fiber-reinforced by Owens-Corning	83+88	98+86	155' west of Lucy Little Rd. inters.	5,957
7	Conventional micro-surfacing	98+86	123+12	47' east of Oxford Dr. intersection	8,761
8	MicroTekk polyester fiber-reinforced by Road Science	123+12	137+00	town line at Beeden Road	5,083
Total Area =					53,490

Two Years later – Slurry-FIL & HiMA

Conventional to Slurry-FIL

HiMA Polymer (right) to Slurry-FIL

Conventional (right) to MicroTekk

Conventional Micro

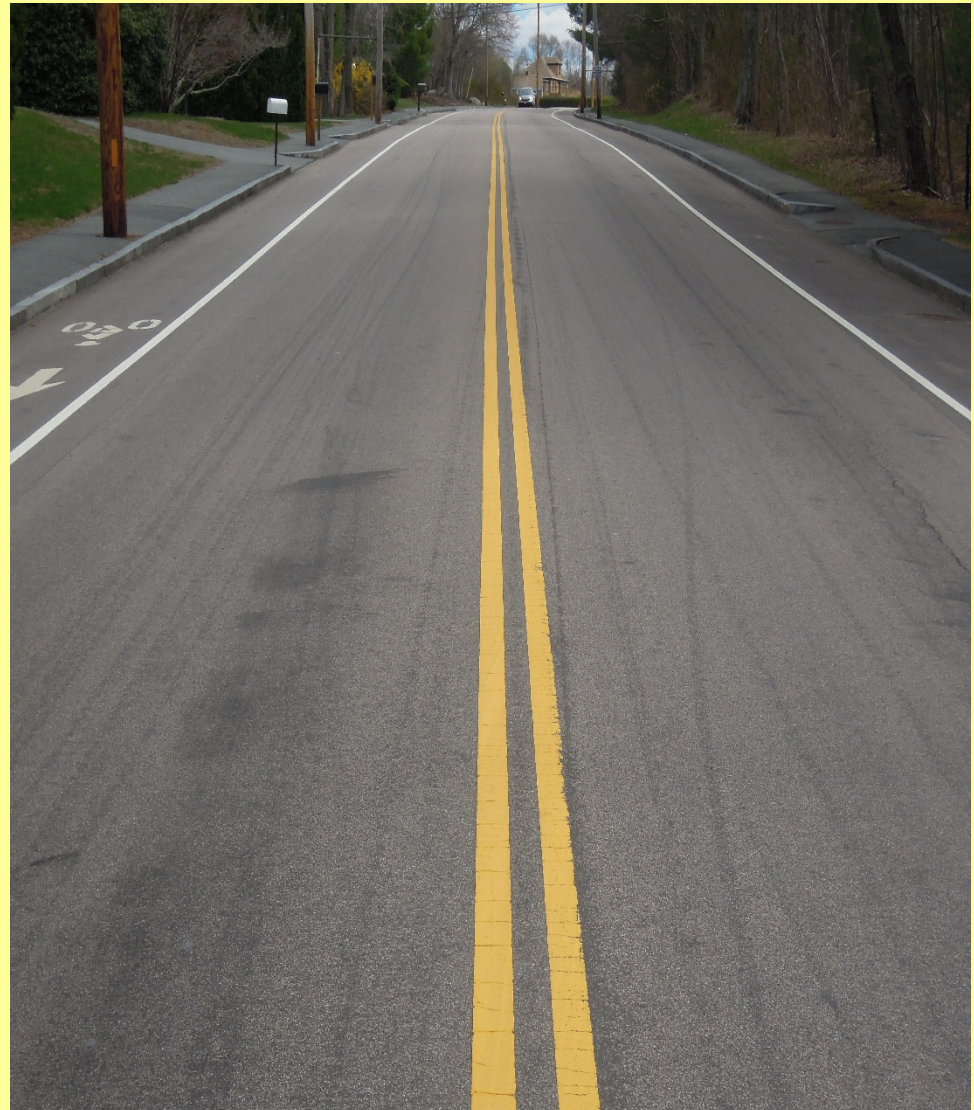

MicroTekk Polyester Fiber

Slurry-FIL Fiberglass Fiber

HiMA Polymer Micro

Park Avenue – August 1, 2014

Bridgeport, CT

2004: 2" Mill & Fill

Fairfield, CT

2004: 2" Mill & Fill

2010: Crack Seal &
Microsurfacing

PREMIUM FOG SEAL: GSB-88

PREMIUM REJUVENATING FOG SEAL: eFog
