Transportation

# What's New In Colorado?

-Chris Volkert, Fleet Manager

## Light Fleet Telematics – Verizon Network Fleet

- Phasing in the entire fleet
- Integrated with WEX to provide fuel exception reporting to managers through a Sharepoint dashboard
- Reduced paperwork and time required for fuel control / accountability
- Exception reporting process alerts managers to potential issues with fuel, speed, location, and unauthorized purchases

## Heavy Fleet Telematics – Zonar

Pilot Program testing began in late 2014 with 100 units on the I-70 Corridor

- Integration with WEX - to track and report fuel purchases, reduce paperwork
- Will provide location, speed reports
- Pre-trip inspections IAW FMC regs; alerts for “Red Tag” conditions
- Working to integrate with MDSS (Iteris) and snow removal system status information
- Working to develop “apps” for work orders in SAP through the tablet
